

ForKhatri — Founder Execution Roadmap

PHASE 1 — FOUNDATION

- ☐ 1.1 Define the ForKhatri problem statement
 - ☐ 1.2 Document major community problems
 - ☐ 1.3 Identify root causes
 - ☐ 1.4 Prioritize problems
 - ☐ 1.5 Define target community
 - ☐ 1.6 Define community boundaries
 - ☐ 1.7 Finalize Vision
 - ☐ 1.8 Finalize Mission
 - ☐ 1.9 Finalize Core Theme
 - ☐ 1.10 Finalize Brand Promise
 - ☐ 1.11 Finalize Foundational Principles
 - ☐ 1.12 Define long-term ambition
-

PHASE 2 — TRUST & ACCOUNTABILITY

- ☐ 2.1 Define identity verification
- ☐ 2.2 Define community verification
- ☐ 2.3 Define professional verification
- ☐ 2.4 Define business verification
- ☐ 2.5 Define domain-specific verification
- ☐ 2.6 Define reputation model
- ☐ 2.7 Define contribution model
- ☐ 2.8 Define feedback model
- ☐ 2.9 Define accountability model
- ☐ 2.10 Define reporting mechanism
- ☐ 2.11 Define dispute handling
- ☐ 2.12 Define fraud prevention
- ☐ 2.13 Define information credibility
- ☐ 2.14 Define content lifecycle / expiry
- ☐ 2.15 Define privacy boundaries
- ☐ 2.16 Define automated verification principles
- ☐ 2.17 Define human intervention / exception handling

Deliverable: ForKhatri Trust & Accountability Framework

PHASE 3 — BUSINESS MODEL

- ☐ 3.1 Define ForKhatri business model
 - ☐ 3.2 Define value proposition
 - ☐ 3.3 Define member value
 - ☐ 3.4 Define partner value
 - ☐ 3.5 Define revenue strategy
 - ☐ 3.6 Define cost structure
 - ☐ 3.7 Define sustainability model
 - ☐ 3.8 Define partnership strategy
 - ☐ 3.9 Define legal/regulatory considerations
 - ☐ 3.10 Define business KPIs
-

PHASE 4 — MODULE STRATEGY

Vyapar

- ☐ 4.1 Define business problem
- ☐ 4.2 Define target users
- ☐ 4.3 Define value proposition
- ☐ 4.4 Define business requirements
- ☐ 4.5 Define verification requirements
- ☐ 4.6 Define revenue model
- ☐ 4.7 Define KPIs

Milavn

- ☐ 4.8 Define business problem
- ☐ 4.9 Define target users
- ☐ 4.10 Define value proposition
- ☐ 4.11 Define business requirements
- ☐ 4.12 Define verification requirements
- ☐ 4.13 Define revenue model
- ☐ 4.14 Define KPIs

Mangaly

- ☐ 4.15 Define business problem
- ☐ 4.16 Define target users
- ☐ 4.17 Define value proposition
- ☐ 4.18 Define business requirements
- ☐ 4.19 Define verification requirements
- ☐ 4.20 Define privacy requirements

- ☐ 4.21 Define revenue model
- ☐ 4.22 Define KPIs

Counsel

- ☐ 4.23 Define business problem
- ☐ 4.24 Define target users
- ☐ 4.25 Define value proposition
- ☐ 4.26 Define business requirements
- ☐ 4.27 Define professional verification
- ☐ 4.28 Define service model
- ☐ 4.29 Define revenue model
- ☐ 4.30 Define KPIs

Dashboard

- ☐ 4.31 Define dashboard purpose
- ☐ 4.32 Define personalization strategy
- ☐ 4.33 Define local information strategy
- ☐ 4.34 Define opportunity strategy
- ☐ 4.35 Define cross-module strategy
- ☐ 4.36 Define trust/reputation visibility
- ☐ 4.37 Define dashboard KPIs

Payment Services

- ☐ 4.38 Define payment business model
- ☐ 4.39 Define supported services
- ☐ 4.40 Define coupon/benefit model
- ☐ 4.41 Define partner model
- ☐ 4.42 Define transaction model
- ☐ 4.43 Define compliance requirements
- ☐ 4.44 Define revenue model
- ☐ 4.45 Define KPIs

Loans & Finance

- ☐ 4.46 Define financial-services scope
- ☐ 4.47 Define target users
- ☐ 4.48 Define financial partner model
- ☐ 4.49 Define verification requirements
- ☐ 4.50 Define eligibility model
- ☐ 4.51 Define regulatory requirements
- ☐ 4.52 Define revenue model

- ☐ 4.53 Define KPIs
-

PHASE 5 — PRIORITIZATION

- ☐ 5.1 Evaluate all modules
- ☐ 5.2 Score community value
- ☐ 5.3 Score user demand
- ☐ 5.4 Score trust impact
- ☐ 5.5 Score revenue potential
- ☐ 5.6 Score differentiation
- ☐ 5.7 Score technical complexity
- ☐ 5.8 Score operational complexity
- ☐ 5.9 Score regulatory complexity
- ☐ 5.10 Select V1
- ☐ 5.11 Select V2
- ☐ 5.12 Select V3
- ☐ 5.13 Define future/parked modules

Deliverable: ForKhatri Product Prioritization Plan

PHASE 6 — COMMUNITY VALIDATION

- ☐ 6.1 Identify initial community cohort
 - ☐ 6.2 Conduct member interviews
 - ☐ 6.3 Validate major problems
 - ☐ 6.4 Validate trust concerns
 - ☐ 6.5 Validate V1 concept
 - ☐ 6.6 Validate willingness to use
 - ☐ 6.7 Validate willingness to pay where applicable
 - ☐ 6.8 Collect feedback
 - ☐ 6.9 Refine business requirements
 - ☐ 6.10 Freeze V1 scope
-

PHASE 7 — BRAND & DESIGN SYSTEM

- ☐ 7.1 Finalize ForKhatri name
- ☐ 7.2 Create logo
- ☐ 7.3 Define colour system
- ☐ 7.4 Define typography

- ☐ 7.5 Define iconography
 - ☐ 7.6 Define imagery style
 - ☐ 7.7 Define design language
 - ☐ 7.8 Define brand guidelines
 - ☐ 7.9 Define multilingual strategy
 - ☐ 7.10 Define accessibility standards
 - ☐ 7.11 Define web design system
 - ☐ 7.12 Define future mobile design system
-

PHASE 8 — MASTER BRD

- ☐ 8.1 Create ForKhatri Master BRD
 - ☐ 8.2 Define platform business requirements
 - ☐ 8.3 Define common requirements
 - ☐ 8.4 Define module requirements
 - ☐ 8.5 Define trust requirements
 - ☐ 8.6 Define security requirements
 - ☐ 8.7 Define privacy requirements
 - ☐ 8.8 Define regulatory requirements
 - ☐ 8.9 Define integration requirements
 - ☐ 8.10 Define business KPIs
 - ☐ 8.11 Review and freeze BRD
-

PHASE 9 — MODULE SDLC

For **each module**:

- ☐ 9.1 Module BRD
- ☐ 9.2 Functional Requirements
- ☐ 9.3 Non-Functional Requirements
- ☐ 9.4 User Journeys
- ☐ 9.5 UX Requirements
- ☐ 9.6 UI Design
- ☐ 9.7 Architecture
- ☐ 9.8 Data Requirements
- ☐ 9.9 Integration Requirements
- ☐ 9.10 Security Requirements
- ☐ 9.11 Verification Requirements
- ☐ 9.12 Test Strategy

- ☐ 9.13 UAT
 - ☐ 9.14 Deployment Plan
 - ☐ 9.15 Operations Plan
 - ☐ 9.16 Monitoring
 - ☐ 9.17 Release
 - ☐ 9.18 Post-release Review
-

PHASE 10 — FORKHATRI TECHNOLOGY FOUNDATION

- ☐ 10.1 Technology strategy
 - ☐ 10.2 Platform architecture
 - ☐ 10.3 Identity architecture
 - ☐ 10.4 Trust architecture
 - ☐ 10.5 Authorization architecture
 - ☐ 10.6 Audit/accountability architecture
 - ☐ 10.7 Data architecture
 - ☐ 10.8 API architecture
 - ☐ 10.9 Search architecture
 - ☐ 10.10 Notification architecture
 - ☐ 10.11 Payment architecture
 - ☐ 10.12 AI architecture
 - ☐ 10.13 Multilingual architecture
 - ☐ 10.14 Security architecture
 - ☐ 10.15 Observability
 - ☐ 10.16 Disaster recovery
 - ☐ 10.17 Scalability strategy
-

PHASE 11 — AI-FIRST FORKHATRI

- ☐ 11.1 Define ForKhatri AI vision
- ☐ 11.2 Define AI assistant capabilities
- ☐ 11.3 Define chat interface
- ☐ 11.4 Define voice interface
- ☐ 11.5 Define cross-module access
- ☐ 11.6 Define permission model
- ☐ 11.7 Define action authorization
- ☐ 11.8 Define AI accountability
- ☐ 11.9 Define AI safety boundaries
- ☐ 11.10 Define scheduling capabilities

- ☐ 11.11 Define personalized recommendations
 - ☐ 11.12 Define multilingual AI
 - ☐ 11.13 Define human escalation
-

PHASE 12 — OPERATIONS & GOVERNANCE

- ☐ 12.1 Define community governance
 - ☐ 12.2 Define verification operations
 - ☐ 12.3 Define support operations
 - ☐ 12.4 Define fraud operations
 - ☐ 12.5 Define dispute management
 - ☐ 12.6 Define partner management
 - ☐ 12.7 Define content governance
 - ☐ 12.8 Define security operations
 - ☐ 12.9 Define legal/compliance operations
 - ☐ 12.10 Define data governance
 - ☐ 12.11 Define incident management
-

PHASE 13 — V1 LAUNCH

- ☐ 13.1 Complete V1 development
 - ☐ 13.2 Complete verification
 - ☐ 13.3 Complete security review
 - ☐ 13.4 Complete UAT
 - ☐ 13.5 Onboard initial users
 - ☐ 13.6 Onboard initial partners
 - ☐ 13.7 Conduct controlled launch
 - ☐ 13.8 Monitor usage
 - ☐ 13.9 Collect feedback
 - ☐ 13.10 Measure KPIs
 - ☐ 13.11 Fix critical issues
 - ☐ 13.12 Public launch
-

PHASE 14 — SCALE

- ☐ 14.1 Measure V1 outcomes
- ☐ 14.2 Improve trust model
- ☐ 14.3 Improve user experience
- ☐ 14.4 Expand geography

- ☐ 14.5 Launch next module
 - ☐ 14.6 Expand partnerships
 - ☐ 14.7 Expand revenue streams
 - ☐ 14.8 Introduce AI-first experience
 - ☐ 14.9 Expand language support
 - ☐ 14.10 Build community leadership network
 - ☐ 14.11 Evaluate expansion beyond initial community
 - ☐ 14.12 Establish scalable operating model
-

FINAL OUTCOME

ForKhatri should evolve through:

**Community Problem → Trust Framework → Business Model → Module Strategy →
Validation → BRD → SDLC → Product → Operations → Measurement → Scale**

Founder Rule

Do not build everything.

Do not build before validating.

Do not sacrifice trust for growth.

Do not optimize for vanity metrics.

Build what creates measurable community progress.
