

# **FORKHATRI**

## **Complete High-Level Business Requirements Document**

**Document Type:** High-Level Business Requirements

**Product:** ForKhatri

**Purpose:** Foundation for Product Strategy, SDLC Planning and Module-Level Requirements

---

## **1. Product Definition**

**ForKhatri** shall be a modern, trusted and technology-driven community ecosystem designed to connect people through shared heritage, culture, values, traditions and collective responsibility.

ForKhatri shall enable members to access:

- Trusted people and networks
- Opportunities
- Businesses and professionals
- Community events
- Matrimonial services
- Professional counsel
- Local information
- Payments and member benefits
- Financial services
- AI-powered assistance

ForKhatri shall begin as a community-focused platform and establish a scalable model for broader community and societal development.

---

## **2. Vision**

**To build a trusted, progressive and united community where shared heritage becomes a foundation for individual opportunity, collective prosperity and generational progress.**

---

## **3. Mission**

**To connect people through shared culture, values and traditions, and empower them with trusted networks, knowledge, opportunities and support to build better lives and a stronger community.**

---

## 4. Vision Tags

Trust · Unity · Progress · Opportunity · Dignity · Prosperity · Heritage · Future

---

## 5. Mission Tags

Connect · Empower · Enable · Support · Protect · Develop · Contribute · Evolve

---

## 6. Core Theme

**TRUST → CONNECT → ENABLE → PROGRESS**

### **Trust**

Create a reliable, verified and accountable environment.

### **Connect**

Connect people through shared heritage, culture, values, traditions and relationships.

### **Enable**

Provide access to opportunities, knowledge, services, guidance and support.

### **Progress**

Improve individuals, families, businesses and the community across generations.

---

## 7. Brand Promise

**Your community. Your opportunities. Your support. Your growth.**

---

## 8. Cultural Foundation

ForKhatri shall recognize that community identity is not based solely on common birth or ancestry.

Community connection may be strengthened through shared:

- Heritage
- Culture
- Traditions

- Values
- Beliefs
- Experiences
- Relationships
- Responsibilities

ForKhatri shall preserve the positive strength of this shared foundation while using modern technology to enable a more connected, professional and progressive future.

---

## 9. Community Philosophy

**Heritage connects us.**

**Trust strengthens us.**

**Opportunity empowers us.**

**Progress moves us forward.**

Members shall be encouraged not only to receive value from the community but also to contribute value to others.

**Receive → Participate → Contribute → Empower Others → Strengthen the Community**

---

## 10. Foundational Business Principles

### 10.1 Trust First

ForKhatri shall make trust a foundational business requirement.

Trust shall be developed through:

- Identity
  - Verification
  - Evidence
  - Behaviour
  - Contribution
  - Reliability
  - Transparency
  - Accountability
- 

### 10.2 Freedom with Accountability

Members shall remain free to participate, communicate, connect, transact and make decisions.

ForKhatri shall avoid unnecessary restrictions.

At the same time, important actions shall be appropriately attributable and accountable.

**Freedom shall not mean freedom from consequences.**

---

## 10.3 Fair Opportunity

ForKhatri shall aim to reduce dependence on:

- Wealth
- Existing networks
- Family influence
- Social status
- Personal influence

for obtaining legitimate opportunities.

Capability, credibility, contribution and reliability shall have meaningful importance.

---

## 10.4 Merit and Contribution

ForKhatri shall encourage recognition based on:

- Capability
- Professionalism
- Reliability
- Contribution
- Positive community behaviour
- Successful outcomes

Popularity alone shall not define reputation.

---

## 10.5 Evidence Over Rumours

ForKhatri shall prioritize reliable and verifiable information.

The platform shall distinguish appropriately between:

- Verified information
- Sourced information
- Community-submitted information
- Unverified information

Unverified claims shall not automatically become accepted community information.

---

## 10.6 Automated Trust

ForKhatri shall prioritize automated and evidence-based verification wherever practical.

Human administrators shall primarily handle:

- Exceptions
- Disputes
- Complex cases
- Safety concerns
- Appeals

The platform shall avoid unnecessary dependence on manual approval.

---

## 10.7 Reputation Is Earned

Members shall be able to establish credibility through demonstrated behaviour and contribution.

Reputation should be influenced by appropriate evidence such as:

- Reliability
  - Professional conduct
  - Successful interactions
  - Community contribution
  - Verified credentials
  - Feedback
- 

## 10.8 Feedback and Improvement

ForKhatri shall encourage improvement rather than creating a purely punitive environment.

Where appropriate, members should be able to:

- Understand issues
  - Receive feedback
  - Correct behaviour
  - Improve credibility
  - Re-establish trust
- 

## 10.9 Information Lifecycle

Information shall have an appropriate lifecycle.

ForKhatri shall prevent permanent accumulation of irrelevant information by supporting:

- Expiry
  - Refresh
  - Archiving
  - Removal of obsolete information
  - Revalidation where necessary
- 

## **10.10 Need Over Noise**

ForKhatri shall prioritize:

- Genuine needs
- Useful information
- Relevant opportunities
- Meaningful connections
- Community support

rather than optimizing purely for:

- Likes
  - Followers
  - Virality
  - Posting volume
  - Endless engagement
- 

## **10.11 Privacy by Design**

Accountability shall not become unnecessary surveillance.

ForKhatri shall:

- Collect appropriate information for legitimate purposes
  - Protect member information
  - Respect privacy
  - Provide appropriate member controls
  - Apply stronger safeguards to sensitive information
- 

## **10.12 Professionalism**

ForKhatri shall promote:

- Responsible communication
- Ethical behaviour
- Quality services
- Professional conduct

- Respectful interaction
- Reliable commitments

Community membership shall not excuse unprofessional behaviour.

---

## 10.13 Community Responsibility

Members shall be encouraged to:

- Help others
  - Share knowledge
  - Create opportunities
  - Mentor others
  - Support businesses
  - Participate in community activities
  - Contribute to community development
- 

# 11. Trust and Accountability Requirements

Trust shall be a **platform-level capability** shared across ForKhatri.

The platform shall support a common trust foundation while allowing every business module to maintain its own verification requirements.

## 11.1 Common Identity

ForKhatri shall provide a unified member identity.

A member should not require a completely separate identity for each ForKhatri service.

---

## 11.2 Module-Specific Verification

Each module shall maintain domain-specific verification appropriate to its business purpose.

Examples:

### Vyapar

- Business verification
- Professional verification
- Business ownership/legitimacy

### Mangaly

- Identity

- Matrimonial information
- Relevant personal/family information

#### **Counsel**

- Professional qualifications
- Credentials
- Relevant licenses/certifications

#### **Loans & Finance**

- Applicable identity/KYC
- Financial eligibility
- Partner-specific verification

---

### **11.3 Accountability**

Relevant actions shall maintain appropriate records of:

- Actor
- Action
- Time
- Context
- Relevant evidence
- Outcome where applicable

This shall enable appropriate accountability without unnecessary surveillance.

---

### **11.4 Reporting and Disputes**

ForKhatri shall provide mechanisms for:

- Reporting
- Complaints
- Disputes
- Fraud reporting
- Appeals
- Resolution
- Feedback

---

### **11.5 Trust Evolution**

Trust shall not necessarily be static.

The system should support:

**Verification → Participation → Behaviour → Feedback → Reputation → Improvement**

---

## 12. ForKhatri Business Ecosystem

ForKhatri shall consist of independently managed business/service modules operating under one common brand and platform ecosystem.

### Core Modules

1. **Vyapar**
2. **Milavn**
3. **Mangaly**
4. **Counsel**
5. **Dashboard**
6. **Payment Services**
7. **Loans & Finance**

Each module shall have its own:

- Business requirements
- User requirements
- Verification requirements
- Operating model
- Revenue model
- KPIs
- SDLC
- Release lifecycle
- Risk management

while remaining connected to the common ForKhatri ecosystem.

---

## 13. Module — Vyapar

### Business Objective

Vyapar shall provide a trusted business and professional ecosystem connecting community members with businesses, professionals, customers, employees, suppliers and business opportunities.

### High-Level Business Requirements

Vyapar shall enable:

- Business discovery
- Professional discovery
- Business profiles
- Professional profiles
- Business networking
- Business opportunities

- Employment opportunities
- Customer discovery
- Business enquiries
- Business partnerships
- Service discovery
- Business reputation
- Verified business presence
- Business promotion

## **Trust Requirement**

Vyapar shall maintain independent verification for businesses and professionals.

## **Business Objective**

Vyapar should help reduce the problem where capable businesses and professionals remain invisible because they lack strong existing networks.

---

# **14. Module — Milavn**

## **Business Objective**

Milavn shall provide a trusted environment for community members to meet, network, participate and build meaningful relationships.

## **High-Level Business Requirements**

Milavn shall support:

- Community meetups
- Networking
- Professional gatherings
- Workshops
- Social events
- Community activities
- Event discovery
- Event participation
- Organizer participation
- Community engagement

## **Trust Requirement**

Milavn shall support appropriate verification of:

- Organizers
- Events
- Relevant venues/partners

- Participants where necessary

## **Business Objective**

Milavn shall strengthen real-world relationships and reduce isolation within the community.

---

# **15. Module — Mangaly**

## **Business Objective**

Mangaly shall provide a trusted matrimonial ecosystem supporting members and families in discovering compatible matrimonial relationships.

## **High-Level Business Requirements**

Mangaly shall support:

- Matrimonial profiles
- Family participation
- Partner preferences
- Match discovery
- Matching
- Interest management
- Controlled communication
- Privacy
- Match recommendations
- Family-oriented interactions
- Matrimonial services

## **Trust Requirement**

Mangaly shall maintain independent matrimonial verification appropriate to the information presented.

## **Business Objective**

Mangaly shall provide a more trusted and accountable matrimonial environment based on verified information, privacy and family participation.

---

# **16. Module — Counsel**

## **Business Objective**

Counsel shall connect members with verified professionals and experts capable of providing appropriate guidance, consultation and support.

Potential areas may include:

- Legal
- Career
- Business
- Finance
- Education
- Technology
- Professional guidance
- Other approved areas

## High-Level Business Requirements

Counsel shall support:

- Professional discovery
- Expert profiles
- Consultation services
- Consultation requests
- Appointment management
- Professional communication
- Feedback
- Service quality
- Professional verification

## Business Objective

Counsel shall help members make informed decisions and access appropriate expertise instead of relying primarily on rumours, influence or unreliable informal advice.

---

# 17. Module — Dashboard

## Business Objective

The Dashboard shall be the **central personalized operating interface** of ForKhatri.

It shall provide members with a relevant view of:

- Their activities
- Community information
- Opportunities
- Services
- Events
- Trust status
- Recommendations
- Notifications
- Relevant local information

# High-Level Business Requirements

## Unified Access

Dashboard shall provide a unified entry point to ForKhatri services.

## Personalization

Dashboard shall provide information relevant to the member's:

- Profile
- Location
- Interests
- Activities
- Needs

## Local Intelligence

Dashboard shall surface relevant local:

- Government information
- Public notices
- Health camps
- Social initiatives
- Events
- Public services
- Community programs
- Opportunities

## Opportunities

Dashboard shall surface relevant:

- Employment opportunities
- Business opportunities
- Education opportunities
- Training
- Scholarships
- Community opportunities

## Member Activities

Dashboard shall provide visibility into relevant:

- Requests
- Applications
- Appointments
- Events
- Transactions
- Interactions

## **Trust**

Dashboard shall provide visibility into appropriate:

- Verification status
- Reputation
- Feedback
- Improvement opportunities

## **Notifications**

Dashboard shall provide prioritized notifications without unnecessary information overload.

## **Fair Exposure**

Relevant opportunities shall be surfaced according to defined relevance and fairness principles rather than simply monetary influence or popularity.

---

# **18. Local Information Intelligence**

ForKhatri shall provide a trusted local-information capability integrated primarily into the Dashboard.

The purpose shall not be to create another generic social-news feed.

## **Information Categories**

The system may identify and surface:

- Government announcements
- Government schemes
- Public services
- Local notices
- Health camps
- Medical camps
- Blood donation programs
- Educational programs
- Social initiatives
- Community events
- Workshops
- Employment opportunities
- Scholarships
- Training programs
- Other beneficial local information

## Information Principles

Information should be:

- Relevant
- Sourced
- Time-sensitive where applicable
- Categorized
- Location-aware
- Trust-aware
- Automatically expired or archived when obsolete

The system should prioritize **usefulness over content volume**.

---

## 19. Module — Payment Services

### Business Objective

Payment Services shall provide convenient access to supported bill-payment and service-payment capabilities while creating additional member benefits through the ForKhatri ecosystem.

### High-Level Business Requirements

The module shall support appropriate payment services such as:

- Utility bills
- Mobile services
- Internet
- DTH
- Insurance
- Education
- Other supported services

### Member Benefits

The module shall support a ForKhatri benefits/coupon ecosystem.

Potential benefits may include:

- Coupons
- Discounts
- Partner offers
- Member offers
- Service benefits

## Ecosystem Integration

Benefits may originate from activities across ForKhatri modules.

Example:

**Mangaly → Member Benefit → Coupon → Payment Services**

## Business Objective

Payment Services should increase everyday utility and recurring engagement with the ForKhatri ecosystem.

---

# 20. Module — Loans & Finance

## Business Objective

Loans & Finance shall connect members with appropriate financial products and verified financial partners.

## High-Level Business Requirements

The module may support:

- Loan discovery
- Financial product discovery
- Eligibility assessment
- Application initiation
- Application tracking
- Partner services
- Financial enquiries
- Financial education
- Other permitted financial services

## Trust Requirement

Financial services shall have independent verification and eligibility processes appropriate to the product and applicable regulatory requirements.

## Business Principle

ForKhatri shall not assume regulated financial roles without the required authorization.

---

## 21. Cross-Module Ecosystem

The modules shall not operate as isolated products.

They shall share appropriate common capabilities while maintaining domain ownership.

Examples:

**Vyapar** → business

→ service

→ enquiry

→ Counsel/payment where appropriate

**Mangaly** → matchmaking

→ communication

→ benefit/coupon

→ Payment Services

**Counsel** → professional

→ consultation

→ appointment

→ Payment Services

**Milavn** → event

→ participation

→ networking

→ Dashboard

**Loans & Finance** → member identity

→ verification

→ financial partner

→ application

---

## 22. ForKhatri Dashboard as Ecosystem Layer

The Dashboard shall bring together relevant information from all modules.

Conceptually:

**ForKhatri Identity**

↓

**Trust & Accountability**

↓

**Member Context**

**ForKhatri Modules**

**Dashboard**

**Relevant Information + Recommendations + Actions**

---

## 23. AI-First Future Experience

ForKhatri shall progressively evolve toward an AI-first user experience.

The long-term experience should allow members to interact with ForKhatri primarily through a unified:

**AI Chat + Voice Interface**

The member should not always need to manually navigate through separate modules.

---

## 24. ForKhatri AI Requirements

The AI should eventually be capable of understanding member intent across ForKhatri services.

Potential capabilities include:

- Discovering people
  - Finding businesses
  - Finding professionals
  - Finding events
  - Finding local information
  - Finding opportunities
  - Scheduling appointments
  - Managing activities
  - Accessing member services
  - Managing supported payments
  - Providing recommendations
  - Managing authorized account actions
  - Communicating in supported languages
-

## 25. AI Action Principle

AI should not have unrestricted authority over member accounts.

The preferred interaction model shall be:

**Understand → Recommend → Authorize → Execute → Record → Confirm**

Risk-sensitive actions shall require appropriate explicit authorization.

AI activity shall remain subject to:

- Permissions
  - Privacy
  - Security
  - Accountability
  - Auditability
  - Safety controls
- 

## 26. AI as Personal Community Assistant

The long-term ForKhatri experience should move toward:

**One intelligent assistant capable of understanding the member and coordinating authorized ForKhatri services on their behalf.**

The AI should understand appropriate member context without unnecessarily exposing personal information across modules.

---

## 27. Multilingual Requirements

ForKhatri shall be designed as a multilingual platform from the beginning.

The system shall be capable of supporting:

- Multiple Indian languages
- Localized UI
- Multilingual content
- Multilingual notifications
- Multilingual search
- Multilingual AI
- Multilingual chat
- Multilingual voice interaction

Initial language priorities may include:

Additional languages shall be introduced based on expansion needs.

---

## 28. Web-to-Application Strategy

ForKhatri shall initially support a modern web experience while maintaining the ability to evolve into mobile applications.

The product strategy shall avoid creating separate business logic for:

- Website
- Mobile application
- AI interface
- Voice interface

The underlying platform should support multiple user interaction channels.

---

## 29. Common Platform Requirements

ForKhatri shall establish common platform capabilities for all modules.

These may include:

- Identity
  - Authentication
  - Authorization
  - Verification
  - Trust
  - Reputation
  - Accountability
  - Notifications
  - Communication
  - Payments
  - Search
  - Personalization
  - Analytics
  - AI
  - Multilingual capabilities
  - Security
  - Privacy
  - Administration
-

## 30. Administration and Governance

ForKhatri shall maintain centralized governance while allowing modules to operate independently.

Central governance shall cover appropriate areas such as:

- Platform policies
- Trust standards
- Security
- Privacy
- Community standards
- Global member management
- Governance
- Audit
- Platform reporting

Individual modules shall manage their domain-specific operations.

---

## 31. Automated Governance

ForKhatri shall prioritize system-driven governance over unnecessary manual intervention.

The platform should use appropriate:

- Automated verification
- Automated classification
- Automated expiry
- Automated detection
- Automated prioritization
- Automated feedback
- Automated risk identification

Human intervention shall primarily address exceptions, disputes and complex cases.

---

## 32. Security Requirements

ForKhatri shall establish security as a platform-level requirement.

The system shall prioritize:

- Account security
- Access control
- Data protection
- Secure transactions
- Auditability
- Fraud prevention

- Abuse prevention
- Secure integrations
- Appropriate monitoring

Security requirements shall be adapted to the risk level of each module.

---

## 33. Privacy Requirements

ForKhatri shall operate according to privacy-by-design principles.

The platform shall:

- Minimize unnecessary data collection
  - Protect member information
  - Provide appropriate controls
  - Restrict access based on legitimate need
  - Maintain appropriate consent
  - Protect sensitive module information
  - Prevent unnecessary cross-module data exposure
- 

## 34. Business Sustainability

ForKhatri shall develop sustainable commercial models without compromising community trust.

Potential revenue sources may include:

### **Vyapar**

- Business subscriptions
- Verified listings
- Promotions
- Lead generation
- Business services

### **Milavn**

- Paid events
- Event services
- Sponsorships
- Premium networking

### **Mangaly**

- Premium memberships
- Enhanced matchmaking
- Verified services
- Professional matchmaking services

## Counsel

- Consultation fees
- Platform commissions
- Professional subscriptions

## Payment Services

- Transaction commissions
- Partner commissions
- Merchant partnerships
- Member benefit partnerships

## Loans & Finance

- Partner commissions
- Referral revenue
- Financial-service partnerships

Revenue mechanisms shall remain aligned with trust, transparency and applicable regulations.

---

# 35. Professional and Community Standards

ForKhatri shall establish standards for:

- Professional behaviour
  - Responsible communication
  - Business conduct
  - Member conduct
  - Information sharing
  - Service quality
  - Fraud prevention
  - Dispute resolution
  - Privacy
  - Community responsibility
- 

# 36. Success Definition

ForKhatri shall not define success only through:

- Downloads
- Registered users
- Page views
- Likes
- Followers
- Content volume

Success should primarily be measured through **real community outcomes**.

Potential outcome indicators include:

- Trusted connections created
  - Opportunities created
  - Businesses discovered
  - Problems solved
  - Successful consultations
  - Meaningful meetups
  - Successful matrimonial connections
  - Useful local information delivered
  - Members helped
  - Community contributions
  - Fraud reduction
  - Trust levels
  - Member retention
  - Member satisfaction
- 

## 37. Product Development Philosophy

Forkhatri shall follow a **platform + independent modules** model.

Each module shall be independently capable of:

**Planning → Requirements → Design → Development → Verification → Testing → Deployment → Operations → Monitoring → Improvement**

while remaining aligned with the Forkhatri platform standards.

---

## 38. Module SDLC Requirements

Each module shall independently establish:

- Business Requirements
- Functional Requirements
- Non-Functional Requirements
- User Journeys
- UX Requirements
- UI Design
- Data Requirements
- Integration Requirements
- Security Requirements
- Verification Requirements
- Testing Requirements
- UAT Requirements
- Deployment Requirements
- Operations Requirements

- Monitoring Requirements
  - Business KPIs
  - Release Strategy
- 

## 39. ForKhatri Product Lifecycle

The overall product shall progress through:

**Community Problems**

↓

**Trust Framework**

↓

**Business Model**

↓

**Module Strategy**

↓

**Community Validation**

↓

**Master BRD**

↓

**Module BRDs**

↓

**UX / Product Design**

↓

**Architecture**

↓

**Development**

↓

**Testing & Verification**

↓

**Controlled Launch**

↓

**Measurement**

↓

**Improvement**

↓

**Scale**

---

## 40. Initial Product Strategy

Forkhatri shall not attempt to build all proposed modules simultaneously.

The initial product shall focus on a limited set of capabilities capable of proving:

1. Members trust the platform.
2. Members obtain meaningful value.
3. Members return to the platform.
4. Members contribute to the ecosystem.
5. The platform can create measurable community outcomes.
6. The operating model is sustainable.

Additional modules shall be introduced based on:

- Validated demand
  - Community impact
  - Trust impact
  - Revenue potential
  - Differentiation
  - Operational feasibility
  - Technical feasibility
  - Regulatory feasibility
-

## 41. Long-Term Expansion

ForKhatri shall initially serve as a prototype for community development.

The long-term ambition is:

**Start with the community → Prove the model → Measure the outcomes → Improve the model → Expand the impact**

Potential future expansion may include:

- Additional geographic regions
- Additional communities
- State-level initiatives
- Broader Indian applications
- Community development infrastructure

Expansion shall be based on demonstrated outcomes rather than assumptions.

---

## 42. Ultimate Product Concept

ForKhatri shall evolve from a collection of digital services into a **trusted community operating ecosystem**.

The long-term experience should enable a member to say:

**"ForKhatri, help me with this."**

and the platform should be able to understand the requirement, identify the appropriate trusted service or information, obtain authorization where necessary, execute permitted actions, maintain accountability and provide the result.

---

## 43. ForKhatri Strategic Model

**Foundation**

**Heritage + Culture + Values + Traditions**

↓

**Trust**

**Identity + Verification + Reputation + Accountability**

↓

## Network

People + Families + Professionals + Businesses

## Enablement

Opportunities + Counsel + Information + Services + Finance

## Intelligence

Personalization + AI + Local Intelligence + Recommendations

## Progress

Better Individuals + Stronger Families + Stronger Businesses + Stronger Community

---

# 44. Final Strategic Statement

ForKhatri is not intended to be merely a community website, social network, directory or collection of applications.

It is intended to become a **trusted, technology-driven community ecosystem** that uses shared heritage, culture and values as the foundation for building trust, connecting people, enabling opportunity, providing support and creating measurable progress.

## Core Equation

TRUST → CONNECT → ENABLE → PROGRESS

## Community Philosophy

Heritage connects us.

Trust strengthens us.

Opportunity empowers us.

Progress moves us forward.

## Long-Term Ambition

Start with the community.

Prove the model.

Scale the impact.
